

NORTHEAST CHAPTER OF THE CHP ALLIANCE: 2023 PROSPECTUS

The Combined Heat and Power Alliance (CHPA) recently merged with the Northeast Clean Heat and Power Initiative (NECHPI) to form the **Northeast Chapter of the Combined Heat and Power Alliance** (NE Chapter). The purpose of this merger is to consolidate efforts and resources to improve the effectiveness of the CHP industry's advocacy in the Northeast market. The merger provides consistent messaging and a consolidated organization with the potential for bigger scope than the two existing organizations had separately. The NE Chapter will continue to be dedicated to accelerating the deployment of efficient CHP applications in the Northeast under the umbrella of the CHPA. The NE Chapter will continue to provide value for its members and focus its efforts in the Northeast CHP market through:

- Strong and consistent advocacy for smart and efficient CHP and distributed energy resources policy, regulation, and legislation;
- Conferences, virtual events and newsletters that keep our members informed and bring together top members of the CHP community from all sectors: developers, utilities, government agencies, and NGOs;
- Raising awareness inside and outside the CHP community about the benefits of clean heat and power technologies and CHP's role in the pathway to zero carbon.

NE Chapter members will continue to be eligible for free NE Chapter webinars and discounted rates at NE Chapter conferences and events. Most importantly, as a NE Chapter member you will have an opportunity to help set policy priorities for NE Chapter and help the NE Chapter's voice be heard in proceedings, rate cases, and policy discussions where CHP is impacted.

CHP's VOICE IN THE NORTHEAST

The NE Chapter's predecessor NECHPI has been a strong voice for over 20 years, engaging in regulatory proceedings across the region, filing comments and participating in working groups for clean energy in Massachusetts, New York, Connecticut, Maine, New Hampshire, Vermont and Rhode Island, including:

- Submitting comments to the CLCPA scoping documents in NYS and SAG PSC for gas CHP incentives in NYS.
- Submitting comments supporting CHP's continued participation in Massachusetts' Alternative Portfolio Standard.
- Advocating for CHP under New York City's Local Law 97 regulating building emissions and Intro 2317.
- Promoting CHP in New York's proceedings on the Clean Energy Fund, Energy Efficiency Portfolio Standard, and Large-Scale Renewables.
- Supported and participated in the creation of Massachusetts' Distributed Generation Interconnection Working Group and filed technical comments supporting CHP's role in Connecticut's Comprehensive Energy Strategy.
- Testified in Maine and New Hampshire in support of net metering, and filed comments on Rhode Island's Renewable Energy Standard, while also participating in their State's Distributed Generation Stakeholders Working Group.

MEMBERSHIP INFORMATION

Please join the NE Chapter and help to support the advancement of CHP.

2023 Membership dues levels are –

- **Full Member:** \$2,100/year
- **Associate Member:** \$1,050/year

FREQUENTLY ASKED QUESTIONS

Why should my organization join the NE Chapter?

The NE Chapter's overarching goal is to accelerate the deployment of efficient clean heat and power applications in the Northeast. Without our members, the NE Chapter activities supporting this goal would not be possible. The merger with the CHPA strengthens our efforts and will help us deliver more results, and this merger couldn't happen at a more critical time for the industry in terms of energy policy and programs in the Northeast and nationally. As we all know, CHP reduces CO2 emissions today and will continue to do so for some time. CHP will continue to provide benefits and have a role in the clean energy future. CHP is a key technology in the path to decarbonization and making that argument is and has been the number one priority.

The NE Chapter is actively rebranding CHP with public officials, policy makers and key stakeholders and although our arguments are sound, CHP still has much to do to secure its place in the clean energy future. By joining, members support the NE Chapter's efforts to create more robust markets for CHP through advancing policies that accurately and fairly value these resources. Members provide critical input on positions that the NE Chapter takes in important regulatory proceedings. Members are also connected to other CHP advocates in the region and receive critical information regarding the ever-changing policy landscape. CHP deployment is facing many challenges throughout the Northeast, and your support is needed now more than ever to ensure that the industry's voice is heard.

What benefits do NE Chapter members receive?

NE Chapter members are eligible for a variety of benefits including discounted rates for NE Chapter conferences and events, free NE Chapter webinars, member newsletters and other member-only communications. Most importantly, all members are eligible to participate in the recurring NE Chapter Member Committee meetings to establish the policy priorities for the chapter and help decide what issues, proceedings and tactics to pursue to favorably influence policy for the CHP industry in the Northeast. We are often the sole advocate for the CHP industry in regulatory and energy policy proceedings in the Northeast. By advocating positions that promote the CHP industry before state public utility commissions and independent system operators across the Northeast, members benefit from decisions that reflect the expert input provided by the NE Chapter. These benefits are significant, long-lasting and of vital importance to the CHP industry.

MEMBER TESTIMONIALS

Here's what some of our members value in the NE Chapter of the CHPA:

"Caterpillar is proud to join and become an active member of the Northeast Chapter of the Combined Heat and Power Alliance whose purpose is promoting the benefits of combined heat and power applications and advocating for policies which will further the development of CHP projects. We appreciate the dedication of the NE Chapter to the CHP market segment and their efforts to promote: Alternative Portfolio Standards, Clean Energy Funds, Energy Efficiency Portfolio Standards, and Large-Scale Renewables. As well having testified in support of net metering and providing comments on Renewable Energy Standards." — **Patrick Barret**

"Solar Turbines is an active member of the NE Chapter of the CHPA and fully supports its commitment to the production of clean & efficient power as a critical part of a resilient & sustainable energy grid and a pathway to net zero carbon emissions. We believe this group provides invaluable outreach & education initiatives to the public community, legislative authorities, and energy industry stakeholders." — **Johnathan Coleman**

"I initially joined NECHPI 15 years ago to meet the companies in the Northeast who were experts in the development, design, and construction of CHP systems. I have since come to appreciate the experts in the group who help us provide input to policy makers and ensure our views are heard and look forward to engaging with members of the NE Chapter of the CHPA going forward." — **John Moynihan**

"The NE Chapter of CHPA is a persistent champion for the benefits of employing combined heat and power throughout the Northeast. The chapter continues to promote and highlight the adaptability and versatility of a tried-and-true approach to energy production that has been available for well over 140 years so that CHP does not get lost in the sea of newly emerging energy technologies." — **Lance Roberts**

"Dalkia Aegis highly values the role that the NE Chapter of CHPA plays on behalf of the CHP industry. For a very reasonable membership fee, Dalkia Aegis gets world-class representation with state policy makers as the chapter studies, prepares, and submits comments throughout the Northeast addressing the various challenges facing our technology. Thankfully, there is a cohesive organization that is taking on these issues and we urge others to get on board with this effective group. We believe this merger will benefit Dalkia Aegis and our Industry and we look forward to broader and more effective outreach from the organization." — **Diane Molotokos**

Make an impact in the industry and shape energy policy by joining these organizations in becoming a member of the NE Chapter, the voice for CHP in the Northeast U.S.:
